

RUMINANT PRODUCT RANGE

**PRODUCTIVITY
MATTERS**

Digestive disorders

DIARRBLOCK

Strong & fast acting antidiarrheal product for all farm animals

- ✓ stabilizes the digestive system thanks to the content of husk of psyllium and lignocellulose
- ✓ probiotic live yeast "*Saccharomyces cerevisiae*" promote the development of healthy intestinal microflora
- ✓ protects the intestinal wall, and provides fast action to stop the diarrhea
- ✓ targets all farm animals, can be mixed with water or milkreplacer

Available packages: 100g, 1kg, 4kg

DIARRBAN

Unique complex of ingredients counteracts the diarrheal problems in all farm animals

- ✓ optimizes the digestive process thanks to the syllium and lignocellulose
- ✓ the content of protein, fat, carbohydrates and vitamins ensure the required nutrients during the time of stress
- ✓ Probiotics "*Bacillus licheniformis* (DSM 5749), *Bacillus subtilis*"
- ✓ Targets all farm animals, can be mixed with water or milkreplacer

Available packages: 100g, 1kg, 4kg

NORMAGEST LIQUID

Complex product improves rumen motility and help against indigestion disorders

- ✓ herbal extracts stimulate the rumen motility
- ✓ stimulates the secretion of digestive juice and increases the appetite

Available packages: 0,5kg, 1L

NORMAGEST DRY

Herbal complex product improves rumen motility and coonetracts indigestion disorders

- ✓ increases the animal appetite and the feed uptake
- ✓ stimulates the digestive tract secretions

Available packages: 100g, 1kg, 4kg

TYMPAGEST

A herbal composition against rumenal tympany in ruminants

- ✓ reduces rumen fermentation processes
- ✓ herbal extract facilitates the removal of accumulated gas bubbles
- ✓ regulates the digestive and rumination process

Available packages: 0,5kg, 1L

Electrolyte & Anti-stress

BOVI-LYTE

Electrolyte preparation

- ✓ source of essential electrolytes, prevents dehydration of the body
- ✓ provides easily digestible source of energy
- ✓ high palatability encourages the consumption of the preparation
- ✓ targets all farm animals

Available packages: 100g, 1kg

BOVI-LYTE C

Mix of vitamin and electrolytes

- ✓ strong antioxidant counteracts this oxidative stress and minimizes the damage caused by free radicals
- ✓ vitamin C plays an important role in improve the immune system, diarrhea prevention & collagen formation
- ✓ beta-carotene is a precursor to vitamin A, improve the immunity & stress resistance
- ✓ targets all farm animals

Available packages: 100g, 1kg

Metabolic Disorders

TURBOCAL

Complex of calcium compounds against hypocalcemia "milk fever"

- ✓ 57.5 gm of free calcium per single dose
- ✓ it contains sources of calcium with high absorption
- ✓ additional source of magnesium
- ✓ high viscous formula to avoid drenching pneumonia during the application

Available packages: 0,5kg, 1L

CALCIMAX

Complex of four calcium compounds counteract postpartum milk fever

- ✓ 55 gm of free calcium per single dose
- ✓ contains both rapid and slow release sources of calcium, to prolong the effect
- ✓ additional source of magnesium
- ✓ high viscous formula to avoid drenching pneumonia during the application

Available packages: 0,5kg, 1L

MEGA PHOSE

The preparation replenishes phosphorus deficiencies

- ✓ supplies the phosphorus necessary in the calving period
- ✓ also provides an additional source of calcium and magnesium
- ✓ high viscous formula to avoid drenching pneumonia during the application

Available packages: 0,5kg, 1L

RUMI BUFFER

A preparation used to manage and reduce the risk of ruminal acidosis

- ✓ stabilizes the acid-base balance in the rumen
- ✓ the preparation is particularly recommended for high-yielding cows

Available packages: 100g, 1kg

ENERGIA PROVIT

Energetic product for ruminants in the period of energy deficiency & risk of ketosis

- ✓ it is a source of the highest quality energy components
- ✓ contains a vitamin complex that strengthens the body's immunity and the vital process
- ✓ reduces the negative energy balance at the key moment of lactation
- ✓ Improves the liver function and animal's body vital processes
- ✓ improves the palatability of the feed, increasing the willingness of the animal to eat

Available packages: 1kg, 5kg

ENERGIA BOOSTER

Energetic product for ruminants in the period of energy deficiency, and risk of ketosis

- ✓ it is a source of various energy components with high digestibility
- ✓ contains a vitamin complex that strengthens the body's immunity
- ✓ reduces the negative energy balance at the key moment of lactation
- ✓ Improves the liver function and animal's body vital processes
- ✓ improves the palatability of the feed, increasing the willingness of the animal to eat

Available packages: 5kg, 25kg, 200kg, 1000kg

ENERGIA MOL

Liquid energy preparation with molasses for ruminants

- ✓ it is a source of energy ingredients
- ✓ it improves the palatability of the food ration
- ✓ supplements the sugar content in the ration

Available packages: 5kg, 25kg, 200kg, 1000kg

KETOBAN

A preparation counteracts the risk of ketosis

- ✓ stabilize the negative energy balance and has markable effect incase of ketosis
- ✓ source of different highly absorbable energy contents that stabilize the negative energy balance
- ✓ contains a vitamin complex that supports the liver function

Available packages: 1kg, 5kg

HAPPY COW DRINK

Strengthening drink for dairy cows after calving

- ✓ recovers the energy lost after calving
- ✓ high palatability encourages the animal to drink
- ✓ prevents post-calving abomasal displacement
- ✓ the right combination of vitamins and minerals enhance the animal vitality after calving

Available packages: 1kg

HEPASTRONG LIQUID

Supports and improves liver functions

- ✓ protects and regenerates the liver due to the content of milk thistle, artichoke extract ginger extract and methionine
- ✓ improves the detoxification process of the body, especially in mycotoxin poisoning
- ✓ provides high sources of energy such as propylene glycol and glycerin

Available packages: 0,5kg, 1L

HEPASTRONG DRY

Liver support product, based on artichoke extract and rumen protected choline and niacin

- ✓ improves the detoxification process of the body, especially in mycotoxin poisoning
- ✓ it protects and regenerates the liver cells

Available packages: 100g, 1kg

PROFIBER

Combination of three fermentation extracts, improves rumen fiber digestion

- ✓ stimulate and improve the enzymatic activity of ruminal bacteria and modify the rumen microbial composition
- ✓ used during the risk of heat stress, to improve the fiber fermentation in the rumen and decrease the heat resulting of the fermentation process
- ✓ incase of low quality roughage content in ration
- ✓ prevents post-calving abomasal displacement

Available packages: 20kg

FERTIPLUS LIQUID

Preparation improves the apparent signs of the estrous phase in ruminants

- ✓ contains complex of vital ingredients necessary to proper esrous cycle phases and succesful conception
- ✓ high B-carotene content stimulates the development of the female reproductive system
- ✓ supports the artificial insimination process & fertility rate of the herd
- ✓ the right combination of vitamins and minerals enhance the animal vitality after calving

Available packages: 0,5 kg, 1L

FERTIPLUS DRY

Preparation improves the apparent signs of the estrous phase in ruminants

- ✓ contains complex of vital ingredients necessary to proper esrous cycle phases and succesful conception
- ✓ high B-carotene content stimulates the development of the female reproductive system

Available packages: 1kg

PREGNAFORT

Preparation for improving fertility & conception rates in dairy herds

- ✓ contains nano-particles of silver and zinc
- ✓ improves the internal enviroment of uterus
- ✓ has a bactericidal properties

Syringe: 50ml

METRIFOAM

Hygienic preparation for cleaning the uterus after calving

- ✓ prevents retained placenta problems
- ✓ Has bactericidal properties

Syringe: 50ml

Udder care

SREBROMAST

Intramammary applicator

- ✓ has a wide anitbacterial effect due to the content of active silver, gold and platinum nanoparticles
- ✓ systematic use of the preparation reduces the risk of mastitis
- ✓ herbal extract has analgesic and anti inflammatory effect on the udder
- ✓ soothing and moisturizing the udder's teats

Syringe: 23ml

Milk Replacer

FITCALF ULTRA CARE

Unique milkreplacer formula for weak calves

- ✓ contains the highest quality milk raw ingredients
- ✓ egg yolk immunoglobulins support and increase the calf immunity
- ✓ necessary vitamins and minirals required to improve the general vital process and the proper growth of the calves
- ✓ probiotic supporting the development of healthy intestinal microflora

Available packages: 1kg

DEFENDER LITE

Milk replacer for the calves, intended for use immediately after colostrum from the 3rd day of life

- ✓ ensures high weight gain and safe rearing thanks to the high content of milk raw materials
- ✓ balanced formula ensures the proper body growth
- ✓ contained probiotics effectively stimulate the growth and activity of beneficial bacteria in the digestive tract

Available packages: 20kg

DEFENDER PREMIUM

Milk replacer for the calves, intended for use immediately after colostrum from the 3rd day of life

- ✓ very high content dairy components translates into a zero level of fiber (0.0%)
- ✓ high protein content and high-quality fats support safe rearing for calves and guaranteeing high weight gain
- ✓ very high absorption and good solubility due to no content of fiber
- ✓ extra content of probiotics and acidifier stimulates the proper development of the intestinal flora and stabilizing the pH of the rumen

Available packages: 20kg

Toxin Binders

TOXIGUARD

Binds mycotoxins in the animal feed

- ✓ contains a combination of adsorbents to increase mycotoxin binding and removal
- ✓ niacin, choline and artichoke extract support liver function
- ✓ stimulates animals digestive processes

Available packages: 20kg

TOXIGUARD YEAST

Strong mycotoxin binder based on multiple adsorbents and yeast wall extracts

- ✓ containing MOS "mannooligosaccharides and β -glucans derived from *Saccharomyces yeast walls cerevisiae*"
- ✓ provides ultimate protection against different types of mycotoxins, and improves the digestion process

Available packages: 20kg

BIOFEED GLOBAL represents more than 15 years of experience of BIOFEED, one of the remarkable Polish market leaders in producing feed, concentrates, premixes, and additives for farm & companion animals as well as feed supplements and animal care products in export & international markets. Using our experience and professional knowledge, we develop our own recipes that guarantee breeding success.

Our goal in BFG is to transfer the BIOFEED success story from the Polish market to different and new international markets by building strong and direct business relationships with our worldwide distributors network.

M. Eltaieby

Head of Export & International Sales
